

Professional Experience

Maang Technologies Private Limited 2023-12-20 - 2024-12-20

Technical Intern

- Technical Experience:
 - Developed and optimized machine learning models for real-world applications, achieving 95% accuracy.
 - Engineered scalable REST APIs using Flask, accelerating backend deployment by 30% and supporting modular microservice integration.
 - Worked with cross-functional teams to design and implement efficient solutions, reducing deployment time by 20% and ensuring smooth integration across systems.
 - Executed advanced data preprocessing, feature selection, and hyperparameter tuning, enhancing model performance by 15%.
 - Adapted to new technologies and tools quickly, showcasing flexibility and initiative.
- Technical Stack : Python, SQL, Flask, Machine Learning, Deep Learning, Data Analysis, Feature Engineering, REST APIs, DBMS, Jupyter Notebook, VSCode, Git, Data Structures & Algorithms.

Key Projects / Involvements

- 1.IPL Score and Win Probability Prediction :
 - Developed a real-time IPL match score prediction system using Random Forest and Lasso Regression,Linear Regressor,Gradient Boosting Regressor achieving 92% prediction accuracy.
 - Built a Flask-based REST API backend to expose the ML models as endpoints for seamless integration with frontend applications.
 - Designed an interactive web dashboard for users to input match conditions such as venue, overs, wickets, and team composition.
 - Performed data preprocessing on historical IPL datasets, including handling null values, encoding categorical variables, and normalization.
 - Engineered meaningful features (e.g., run rate, overs left, wickets remaining) to enhance model precision and minimize prediction error.
 - Implemented modular backend logic for scalability, reducing average response latency by 25%.
 - Applied model evaluation techniques (R^2 , MAE) to assess performance and refine predictions.
 - Integrated a win probability predictor by calculating match momentum and run projections based on historical trends.
- Technical Stack : Python,Flask,Linear Regressor,Random Forest Regressor,Gradient Boosting Regressor,Scikit-learn
- 2.Rice Crop Disease Detection :
 - Deployed a deep learning web application leveraging ResNet-50 for rice disease classification, attaining 98% classification accuracy on custom dataset.
 - Collected and preprocessed a dataset of 10,000+ images covering four major rice diseases, ensuring robust model training.
 - Built a Flask backend for seamless model integration, enabling real-time predictions with <1 second response time.
 - Designed an interactive UI with drag-and-drop image upload, reducing user input time by 20%.
 - Optimized the model for inference speed, achieving 2x faster predictions compared to baseline models.
- Technical Stack : Python, Flask, HTML, CSS, JavaScript, Deep Learning (CNN)

Certificates and Awards

- GATE - Data Science and AI - 2025 Qualified:
Demonstrated proficiency in advanced topics like machine learning, AI, and data science through a nationally recognized competitive exam.
- Data Science and Machine Learning Certification - GeeksforGeeks :
- Machine Learning,DL,NLP Certification - Udemy:
- Data Structures and Algorithms through Python Certification - GeeksforGeeks :
- Python (Basic) Certification - HackerRank :
- SQL (Basic) Certification - HackerRank :
- Problem Solving 5 ★ HackerRank Badge :
- 5 ★ SQL Badge :

About me

✓ GATE 2025 Qualified – Data Science and Artificial Intelligence (DS & AI). Demonstrated strong analytical and problem-solving abilities with a solid foundation in core concepts of data science, machine learning, and artificial intelligence.

Career Objective

Aspiring Software Engineer with a strong foundation in Python, Machine Learning, and Web Development. Experienced in designing, developing, and deploying end-to-end software solutions. Skilled at collaborating with cross-functional teams and solving real-world problems through technology. Passionate about leveraging programming skills and innovative thinking to build efficient, impactful, and scalable applications.

Technical Skills

Python	
Datastructures and Algorithms through Python	
Machine Learning	
Artificial Intelligence	
Database Management System	
SQL	
Data Analysis	
fastAPI	

Areas of Expertise

Data Science	Machine Learning
Web Development	Software Engineering
Problem-Solving & Algorithms	

Tools/Code Quality Tools

VSCode	Jupyter Notebook	Google Collab
--------	------------------	---------------
