Professional Summary

Software Engineer with 1+ year of experience building scalable web applications using **Python, FastAPI, GraphQL, React.js, and MongoDB**. Skilled in **API development, microservices, and Docker-based deployment**. **GATE 2025 Qualified in Data Science & Artificial Intelligence**, with strong analytical and problem-solving skills.

Education

IIIT RGUKT RK Valley Computer Science B.Tech CGPA: 9.02	2021 - 2025
IIIT RGUKT RK Valley Degree in Pre-University Course (MPC) CGPA: 9.58	2019- 2021
ZPHS RV Palli Full-time Secondary School GPA: 10.0	2018 - 2019

Experience

Achala IT Solutions | Software Engineer

📍 Hyderabad, Telangana | 📅 Jun 2025 – Present

- Developed scalable REST APIs and microservices using FastAPI, improving request-response efficiency and system performance.
- Built GraphQL APIs using Strawberry and implemented optimized query resolvers for faster data retrieval.
- Worked with Node.js and NestJS to create modular backend services with clean architecture and maintainable code.
- Designed and managed database schemas in both MongoDB and PostgreSQL based on service requirements.
- Integrated ORM/ODM tools such as SQLAlchemy, Prisma, and Motor to streamline data access layers.
- Implemented caching, pagination, and query optimization techniques to enhance performance and reduce latency.
- Created API versioning and service-to-service integration workflows to maintain backward compatibility across modules.
- Collaborated with frontend and DevOps teams to design robust end-to-end backend architectures.

Maang Technologies Pvt. Ltd | Software Developer Intern

📍 Remote | 📅 Nov 2024 – Nov 2025

- Gained hands-on experience in full-stack development using FastAPI, REST APIs, MongoDB, and PostgreSQL.
- Built and integrated backend services using FastAPI with well-structured REST API endpoints for seamless data flow.
- Developed an IPL Score Prediction Model using Machine Learning, achieving 92% accuracy.
- Strengthened understanding of end-to-end application development, including API design, database handling, and deployment.

Skills

- **Programming** : Python, JavaScript, Typescript
- **Backend** : FastAPI, Node.js, NestJS, REST APIs, GraphQL
- **Frontend** : HTML, CSS, Javascript, React
- **Databases** : MongoDB, PostgreSQL, SQL
- **Tools** : Docker, GitHub, VSCode, PgAdmin, Jupyter Notebook, MongoDB Compass
- **Machine Learning** : Model Development & Evaluation

Projects / Open-Source

AHS Patient Engagement Platform — AIG Hospitals

Tech Stack : *Python, FastAPI, GraphQL (Strawberry), React.js, MongoDB, JWT, AsyncIO, Pydantic, Docker, GitHub*

- Designed and developed backend APIs using FastAPI, GraphQL (Strawberry), and MongoDB for patient registration, authentication, and appointment scheduling.
- Implemented JWT-based authentication and role-based access control for secure access management.
- Built provider-slot orchestration to handle real-time scheduling workflows.
- Integrated backend with React.js frontend, enabling dynamic patient booking flows and doctor availability dashboards.
- Utilized Pydantic for schema validation and AsyncIO for asynchronous request handling to improve performance.
- Containerized microservices using Docker and maintained repositories via Git & GitHub for version control and collaborative development.

PEP Leads Conversion

Tech Stack : *Python, FastAPI, REST APIs, React.js, MongoDB, JWT, AsyncIO, Pydantic, Docker, GitHub*

- Developed and maintained backend services using FastAPI and RESTful APIs for healthcare data processing workflows.
- Implemented logic to create and manage patient visit records, improving tracking of historical summaries and follow-ups.
- Designed and integrated a comprehensive analytics dashboard for lead conversion metrics and patient insights.
- Collaborated with data and frontend teams to ensure scalable, accurate, and seamless API integration across modules.
- Used AsyncIO for concurrent execution, Pydantic for data validation, and Docker for consistent deployments.

Certifications

- Data Science & Machine Learning - [GeeksforGeeks](#)
- Data Structures & Algorithms (Python) - [GeeksforGeeks](#)
- Python (Basic) - [HackerRank](#)
- Problem Solving (5 Star) - [HackerRank](#)
- SQL (Basic) - [HackerRank](#)
- SQL (5 Star) - [HackerRank](#)

Honors & Awards

GATE 2025 Qualified – Data Science & Artificial Intelligence
